1) Install Jenkins-supported java

      sudo apt update

      sudo apt install openjdk-11-jdk -y

2) Install the latest version of the Jenkins war file

      wget http://mirrors.jenkins.io/war-stable/latest/jenkins.war

It will download a hidden file 'jenkins.war'; you can check it using 'la -a'

3) Execute the downloaded war file specifying the HTTP port as 80

      sudo java -jar jenkins.war --httpPort=80 --prefix=/dashboard

Copy the password given in the verbose logs o the screen. And got to the below-mentioned address in your browser:

      <ip-address>/dashboard

Enter the copied password on the input on the above page.

Jenkins is all set to be used!
